Multimedia production

EFPME  
2014 - 2016

**Master** - Population and  
Development sciences

ULB - Université Libre de Bruxelles  
2009 - 2011

## PROFILE

I have always been a gamer. Three years ago, I discovered that creating games was even more fun! I have been using Unity to create game prototypes ever since I found a visual scripting plugin that would fill in my generalist gaps. I am enthusiastic about bringing my QA and Product Management experience along.

## WORK EXPERIENCE

### Letsbuild

Product Manager

2022 - 2023

- Set up and consume data analytics to identify opportunities and validate the adoption of new features.
- Recurrent customer interviews to gather feedback, validate assumptions and test prototypes.

Product Operations

2020 - 2022

- Align teams and members through the development of a Risk Assessment process for squads.
- Bring cohesion and spot team issues early through the development of a Happiness Survey.

Quality Assurance

2018 - 2020

- Manual and Automation testing (java, selenium).
- System, Functional, Regression, Smoke, Exploratory, E2E.
- Document and Prioritise identified bugs on Jira.
